

DR. JENNIFER SURJANA, DACM, L.AC.

HOLISTIC FERTILITY SPECIALIST

Founder of SOURCE Fertility & Infinite Fertility
87% Fertility Success Rate | 20+ Years Experience

Dr. Jennifer Surjana is a board-certified Doctor of Traditional Chinese Medicine, international fertility thought leader, and founder of two trailblazing brands: SOURCE Fertility, an elite U.S.-based clinic with an 87% success rate, and Infinite Fertility, a precision-based virtual program for women ready to reclaim their fertility - without synthetic protocols or years of waiting.

For over 20 years, she has helped thousands of women conceive, even after IVF failures and diagnoses like "unexplained infertility." Her proprietary ORIGIN Method blends Traditional Chinese Medicine, functional lab diagnostics, and nervous system recalibration to awaken the body's innate intelligence.

She is one of the most in-demand fertility doctors in the country, and the first to bring luxury-level holistic fertility care to high-achieving women around the world.

"The body doesn't need to be controlled. It needs to be remembered."
